Golf Cart - Model GC2

Our Golf Cart Trailer is equipped to haul more than just a golf cart! Built in either a 5'x8' or a 5'x10 model, this trailer is perfect for golf carts, ATVs, lawn mowers, or motorcycles. A 13-gauge steel tread plate floor provides superior strength as well as a nice way for motorcycle enthusiasts to bolt in a wheel chock. A 1,500lb axle, a 10" wheel, and a bias utility tire help give this trailer a low profile for easy loading.

The 5'x8' provides enough length to haul your cart without the need to remove your bags. Or, if you need added storage, our 5'x10' might just be the ticket!

The 2" x 2" 11-gauge square-tube tongue is formed to provide a level ride when coupled to most vehicles. A 2K swivel-up jack also provides the ability to uncouple with ease.

The GC2 model comes equipped with a 5'x40" gate that makes loading a breeze. The gate also will fold inside the bed to help eliminate wind resistance when hauling empty.

The Golf Cart Trailer comes standard with a 6" formed tie rail (*shown to left*), which is similar to the 6" tie rail option for our utility models, and also comes with corner tie downs (*shown below*), giving you numerous places to tie down your load.

LED lights finish this trailer off and make it one of the nicest Golf Cart Trailers on the road. The taillights are also protected on this trailer in a recessed channel while an angle wire track welded to the bottom of the trailer shields the wiring from the elements and helps keep these lights shining bright!

We offer several options including 5 standard colors (*no upgrade charge for our colors!*) available: CAT Black, Smoke Grey, Carmine Red, CAT Yellow, and John Deere Greene.

Give your nearest Dealer a call today to check out a Finish Line Trailer model GC2!
